

400 Heads

Product Improvement

To continually improve on our product quality and facilitate production, Racor will be rebuilding the 400 Series head die-cast mold and in doing so, will also be removing excess material from the underside (that which faces the spin-on filter).

This change will also improve our efficiency by eliminating an unnecessary machining operation. The effective date is approximately April 2009. This change does not affect fit, form, function, durability, aesthetics or performance.
